

Laser Hire Fact Sheet- Cold Laser Hire Joondalup

At Lakeside Laser we provide our patients with the opportunity to hire our hand held cold/ low level laser devices to use and operate in the comfort and safety of their own home.

The devices offer a combination of infrared laser therapy and feature an infrared laser diodes, red LED's and infrared emitting diodes for delivery of laser and light therapy. The Lasers are a non-invasive device that provides relief of muscle and joint pain, arthritis, muscle spasms and muscle stiffness.

Conditions which are treatable with the Cold Lasers:

- Post operation
- Facial rejuvenation
- Foot and heel pain
- Wrist and ankle sprains
- Arthritic conditions
- Tendonitis and bursitis
- Trapped nerves and nerve pain
- Headaches, vertigo and jaw pain
- Fibromyalgia
- Shoulder/elbow/hip/knee pain
- Neck and lower back pain
- Fractures
- Shingles
- Neurological conditions ie. MS and Parkinson's

Along with many more.

We have 2 Lasers available for hire;

- **The Pain Away PostOp Portable Laser**
 - *Hire cost = \$120 per week*
 - The PainAway Post Op laser can significantly decrease postoperative pain by up to 82% and modulate pro-inflammatory cytokines for a shorter hospital stay, better recovery and stronger and more flexible repair tissue.
 - The laser device has 3 programs which operate for different things. Program 1 is for deeper structures and is used for acute pain, it also improves circulation & promotes relaxation of muscle tissue. Program 2 is for deep structures, it reduces pain and is best for bone, muscle, tendon and ligament injuries. Program 3 is for more superficial structures and provides pain relief.

Specifications	Settings
Device Type	Portable
Super Pulsed Laser	1x15W 905nm
Infrared LEDs	4x 875nm
Red LEDs	4x 660nm
Power output	133 mW
Battery output	8 hours
Program 1	50 Hz
Program 2	250 Hz
Program 3	1,000-3,000 Hz

- **MR4 Desktop Console+SE Emitter.**

- Hire cost = \$140 per week

- Comprehensive package with everything you need. This system includes the desktop console with the SE25 standard emitter and is extremely versatile. This super pulsed laser system produces 25W of peak laser power.

Specifications	Settings
Device Type	Desktop
Super Pulsed Laser	1x 25W 905nm
Infrared LED's	4x 875nm
Red LED's	4x 660nm
Magnetic induction	35 mT
Power output	105 mW
Menu 1	6 preset programs
Menu 2	6 sweep programs
Menu 3	12 manual programs
Menu 4	Personalised programs

Full training is provided for both lasers.
